

# REFERENCE STRAIN CATALOGUE PERTAINING TO ORGANISMS FOR PERFORMANCE TESTING OF CULTURE MEDIA

This catalogue is placed on line in response to a request by the ISO TC 34 SC 9 Joint Working Group 5 and the ICFMH-WPCM.

## Foreword

This catalogue was produced to enable broader and easier access to the reference strains listed by the ISO TC 34 SC 9 Joint Working Group 5 in the ISO 11133<sup>1</sup> and by the Working Party on Culture Media of the International Committee on Food Microbiology and Hygiene (ICFMH-WPCM) in their publication *Handbook of Culture Media for Food and Water Microbiology*.<sup>2</sup> It fulfils a need expressed by these bodies for a unique system of identifiers for strains recommended for use in quality assurance. The WFCC and the WDCM have initiated a system that will help users find local sources of the reference strains by citing all collections and providing contact details and the collection's unique reference. Future publications of the ISO and ICFMH-WPCM will cite the WDCM reference number for each strain and this catalogue provides the collection acronyms and strain numbers of the relevant strains so that they may be found.

## TABLE OF CONTENTS

1.	<b>List of Strains – listing WDCM unique identifiers and links to source collections</b>	
	<b>a. Bacteria</b>	<b>2 – 14</b>
	<b>b. Filamentous Fungi and Yeasts</b>	<b>15 – 17</b>
2.	<b>Strains Listed by WDCM Number</b>	<b>18 – 31</b>
3.	<b>List of Collections and contacts</b>	<b>32 – 38</b>
